Fullstack Web Development; Computer Science

Drexel University — 2018
Bachelor of Science in Health Sciences
Summa Cum Laude; 3.92 GPA

Bard College at Simon's Rock — 2015
Associate of Arts
Graduated at age 18; Dean's List

PROJECTS

BACKPACA.APP

I worked on a four-person team to build this social application for tracking and sharing your travels with friends. We used React, Apollo Client, GraphQL Yoga, and Prisma, having only had prior experience with React.

NOTES.LOLA.CODES

I built this minimalist note-keeping web application using Vue, Express, Node, & SQLite.

RECIPES.LOLA.CODES

Using Vue, Express, Node, SQLite & Firebase, I built a recipe book application that allows users to add, update, and delete the ingredients and steps needed for a recipe.

EXPERIENCE

PROJECT MANAGER

Alongside my full-time studies, I lead and manage 8 other students who are covering material from earlier in the curriculum. I work with them individually and as a team to clarify concepts, demonstrate whiteboarding algorithms, write code reviews, and lead standups.

TELEHEALTH INTERN

For six months of my Bachelor's program, I gathered and analyzed patient information at Magee Rehabilitation hospital for the development of a telehealth program to improve patient outcomes.

CRISIS COUNSELOR

For the past year, I've been a volunteer Crisis Counselor for Crisis Text Line – a free SMS-based crisis intervention platform, where I de-escalate people at risk of suicide, self-harm, and other crises.

YOGA TEACHER

In 2015, I spent a summer training intensively to become a certified yoga teacher.
